- MiTi Pumps has gained and upheld a reputation of experience, dependability and service excellence in our industry.
- 2 Branches & strategically located in the vicinity of major operating areas
- Our extensive experience in Manufacture, Sales and repair of pumps is your piece of mind

Centrifugal pumps

MiTi Pumps supplies different types of pumps for the Australian wine, brewery, juice and industrial markets. We understand the importance of delicate handling and gentle transfer of must and wine. Whether you have a large winery with high volume production, or a small wine making project at home, our expert staff can help fit the best solution for you. Our Centrifugal Series wine Pumps are mainly used for the pump over process, must transfer, racking, fining and filtration. In addition to the winemaking benefits, the pumps unique seal system allows for simple and carefree maintenance. Another ideal pump in our line-up.

Parts and Fittings

MiTi Pump stock a variety of high quality parts and fittings including transfer and suction hose, CORIOLIS and MAGFLOW meters and sanitary fittings and adapters to name a few. We provide quality service and stock most aftermarket spare parts for most major pumps brands available on the market.

Barrell Filling

MiTi Pumps offer a robust reliable Barrell Filling option that has been tried and tested. The system can be fully automated or manually operated. It will automatically slow down and switch off once the barrel is full or empty. Racking height can be easily adjusted on every barrel.

Features and Benefits

- Robust industrial quality filling lances with centralizing barrel rests
- Can be fully automated or manually controlled
- Two stage cycle ensures consistent filling heights.
- Barrels can be short filled for ferments
- No more spillages minimising wine losses due to overflows.
- Allow staff to safely multitask while barrel is filling or emptying.
- Does not require a skilled operator.
- One person can fill in excess of 60 barrels per hour.
